

Personal AI Use Contract

Name:

Class:

1. Where do you land, personally, on the effect(s) of AI on individuals and/or society?

Before setting boundaries for your own use of AI, write a few sentences reflecting on how you feel about AI's effect on individuals and/or society. How do you think AI benefits individuals and/or society? How do you think AI harms individuals and/or society (what are ethical dimensions of AI use)? You are encouraged to consider both angles. You may consider effects on learning or other kinds of impacts (environmental, social, economic, etc.).

Suggested reading: [2026 Report from MIT's Ad Hoc Committee on AI Use in Teaching, Learning, and Research Training](#) (I would love to hear from you on other resources you've found helpful in thinking about AI!)

Try to keep this reflection in mind as you work through the following prompts.

2. How will you NOT use AI tools in this class? In alignment with your own views on the effects/ethics of AI and how is best to learn, how are you placing limits on your use of AI?

3. What are you allowing yourself to use AI tools for in this class? This must be in compliance with the course policy. Reference the syllabus before beginning.

4. How will you know you're using it well? Reflect on how you will evaluate your use of AI tools and if it is supporting, rather than replacing, your learning.

5. How will you support your efforts towards “productive struggle”? Getting stuck is a part of learning! Even though it isn't always fun, it *can* be productive and extremely beneficial. It is good to exercise the muscle of your brain! What are some habits that you'll use this term to support yourself while you're exercising your brain? (e.g. contacting a classmate, taking a walk, writing out detailed notes, the [rubber duck method](#), etc.)
